

# ONSITE CHEMICAL INVENTORY

70889881007

SCI 501

TRADE

SOO-TOL PRECAUTIONARY LABELS

Contact OSI to perform your chemical inventory and prepare chemical classification reports as part of annual fire inspections and prior to construction projects.

Be sure you have an accurate inventory of hazardous materials in each control area.

OSI will conduct a physical inventory of chemicals, gases, and hazardous waste containers and barcode them for easy employee access. Facility personnel are then trained to enter new chemicals and delete empty chemicals. During annual fire inspections companies are required to submit chemical classification summary reports. OSI will generate these reports accurately and efficiently.
