

CONFINED SPACES

Underground and Aboveground Storage Tanks

Occupational Services, Inc. (OSI) can provide Certified Industrial Hygienists (CIHs) to safely monitor confined space entries.

We offer the following safety training courses:

- 40-Hour Hazwoper**
- 8-Hour Refresher**
- 8-Hour Supervisor**
- Confined Space Entry**
- Respiratory Protection**
- Hazard Communication**

The entry into an Aboveground or Underground Storage Tank is dangerous, yet sometimes necessary, work. Especially during tank inspections, repairs, or removal. OSI is equipped and trained to properly supervise these confined space entries in conformance with Cal/OSHA and San Diego County and other counties Environmental Health Department governmental regulations.
